Weight: 20 kg

The garden furniture in our collection has unique design and excellent functionalities. We are aware that this kind of furniture should be resistant to the external conditions and therefore all technological methods that we apply are aimed to improve its resistance properties. We use a dried steam beech wood or softwood to manufacture the furniture. The jointing is metal with good strength characteristics. The wood processing is a three-layer one - impregnant, primer and paint finish suitable for outdoor conditions. Besides the main brown-red azure colour, the client may choose between other colour options - wenge, transparent white, deep colours, etc.

The furniture is supplied unassembled in boxes along with instructions for assembly, or fully assembled in a transport package. The warranty period of the products is 24 months.

After this period we provide an after-sale service and maintenance, as well as the necessary paint finishes to freshen the furniture. The garden furniture we produce meets the BS EN581-3 requirements.
